PROFILE

Computer Science undergraduate specializing in Netcentric Computing with a strong foundation in web development, computer networking, system administration, cybersecurity, information security and backend technologies. Skilled in troubleshooting IT systems, designing networks solutions and engineering principles to distributed computing environments. Experience in developing web applications, applying modern concepts such as cloud, IoT and artificial intelligence, and working with databases. Demonstrated adaptability, fast learner with problem solving skills and collaborative teamwork in academic and project settings. Eager to contribute technical knowledge and practical skills to support IT operations and gain hands-on industry experience.

WORK EXPERIENCE

Angkatan Pertahanan Awam

April, 2021 – January, 2022

Prebet, anggota skuad

Banting, Selangor

- Worked in operations to rescue and capture venomous animals.
- Duties became a frontliner during covid 19 in June 2021. The task given was to provide food and take information about patients who were in quarantine.
- Collaborate with volunteers to ensure that all patients who take the Covid-19 vaccine follow the SOP set by the government.
- Worked as a team in the flash flood disaster in Banting in December 2021. Provide friendly interaction with other operational staff, victims and volunteers.
- Worked in the operations office which is Pusat Kawalan Operasi Daerah (PKOD) to take information about the case and report to the Pusat Kawalan Klang.

Panasonic Industrial Devices Malaysia Sdn. Bhd.

June, 2022 – July, 2022

Part-time by day

Shah Alam, Selangor

- Interact with workers and learn about air conditioning installation.
- Gained hands-on experience in electrical component fitting product assembly within a fast paced environment.
- Developed strong attention to detail, teamwork and time management skills while meeting daily production targets.

Ira Dessert

May, 2023 – Oct, 2023

Sales and marketing agent

Shah Alam, Selangor

- Promoted and sold dessert products to UiTM students and achieved consistent sales targets.
- Developed strong customer service and communication skills by engaging with customers.
- Managed orders, payments and delivery to ensure smooth transactions and customer satisfaction.

EDUCATION

Universiti Teknologi Mara

Bachelor of Computer Science (Hons.) Netcentric Computing | CGPA 3.14

Ungraduated

Shah Alam, Selangor

Kolej Matrikulasi Selangor

Jurusan Sains Modul III (Sains Komputer) | 3.46

Graduated 2023

Banting, Selangor

Sekolah Menengah Kebangsaan Jugra

Pure Science Stream | SPM 4A

Graduated 2021

Banting, Selangor

SKILLS

Programming & Scripting

- Python, Java, C++, JavaScript, Bash, HTML, CSS, PHP

Software Development

- Docker, OOP, MVVM, SDLC

Cybersecurity & Networking

- Wireshark, Kali Linux, Penetration Testing, FTK Imager, Autopsy, Network Monitoring, TCP/IP, DNS, DHCP, VPN, Routing & Switching, Window Server

Web, IoT & APIs

- React.js, Node.js, Express.js, RESTful APIs, Arduino IDE, IoT Systems, REST API, Multer, Nodemailer

Database

- MySQL, MongoDB, Firebase

Tools

- Visual Studio Code, Git, GitHub, Android Studio, Cisco Packet Tracer, Windows, Windows Server, Linux (Ubuntu, Kali), Figma, Laravel

Soft Skills

- Communication (written and verbal)
- Teamwork & effective collaboration in group projects
- Fast learner with problem solving
- Time management
- Adaptability

CERTIFICATE

- HCIA-Cloud Computing - CYBERSECURITY DAY 2026 - HCIA-IT

PROJECT

PartTimeHub

Final year project | JavaScript, React.js, MongoDB

- Developed a full-stack web application that connects students with part-time job opportunities and allows employers to recruit suitable candidates.
- Implemented real-time messaging functionality between students and employers for communication and job inquiries.
- Designed responsive user interfaces using React.js with dynamic dashboards for students, employers, and administrators.
- Managed MongoDB database models and RESTful APIs for users, jobs, applications, notifications, and messaging.

Perkhidmatan Membekal, Memasang, Mengkonfigurasi dan Menguji Lesen Perisian Data Analitik di Bahagian SMPKE, Pejabat Perdana Menteri

Network and System Administration Project Report

- Developed a complete project proposal for the deployment of a Data Analytics Software solution in a virtualized server environment.
- Planned system architecture, software installation, configuration, testing, and maintenance activities based on client requirements.
- Collaborated with a project team to analyze requirements, propose technical solutions, and ensure compliance with project specifications.
- Produced project schedules, risk assessments, and technical compliance documentation for system deployment and support services.

Unitrack: Lost & Found System

Backend Technology Project Case Study | Windows Server, Laravel, Flutter

- Designed and implemented the backend system using Laravel framework for efficient data handling and secure API integration.
- Developed mobile interface with Flutter to ensure smooth communication between client and server.
- Deployed and managed the application on Windows Server that focuses on stability and scalability.
- Coordinated system architecture, database design and integration to support lost and found item tracking.

Memory & Malware Analysis

Digital Forensic project | Volatility, DumpIt, VirusTotal

- Analyzed a malware-infected memory image to identify malicious processes and suspicious network connections.
- Applied memory forensic techniques using Volatility Framework to extract and investigate digital evidence.
- Validated malware indicators through VirusTotal and documented findings in a technical forensic report.
- Investigated process trees, command-line activities, and memory injections to determine malware behavior.
